

RHM Summer 2010

Ötztal in the Tyrol

15-22. August – Austria

Dear friends,

„Climbing is one of the oldest kinds of „Tyrolean“ sport, so it is no wonder that Tyrol is called the land of unlimited climbing potential!“ In no other valley of Tyrol are there such wonderful climbing areas and via ferrata so close together. The valley is one of THE granite climbing areas in Tyrol, offering an extensive fare for everyone of at least 600 routes in various equipped crags. Whoever wants to go higher, has the opportunity to scale the second highest mountain of Austria, the Wildspitze at 3772m. Jutta Koll, a local, has put together a very extensive set of information for us, which we will give out to everyone. We should be eager to find out more. Everybody will be satisfied here.

A selection of climbing guides:

Just published: Climbing Ötztal / Imst-Gurgltal, 2010, 176 pages in German. Günter Durner, Gerhard Gstettner, TMMS-Verlag, www.klett-shop.de

Sport Climbing Guide by Michael Meisl Tirol 2008, www.routebook.com, ISBN 978-3-00-023604-4
Zillertal climbing and bouldering

Panicoführer: Wetterstein, Karwendel, Rofan, Kaiser, Steinplatte

Requirements for participation:

Each climber who comes to the meet needs to be independent and responsible for herself. It does not matter at what level you climb, whether at grade 4 or 8, all are welcome. There will be no instruction in rock climbing. Insurance is the responsibility of the participants. RHM disclaims any liability for accidents.
